

# “Informatics for Nanomanufacturing” Workshop: October 15, 2013

*Data—Tools—Sharing*

The National Nanomanufacturing Network (NNN) coordinated a workshop convening participants from industry, academia and government to discuss the utilization of informatics in nanomanufacturing. This workshop helped to identify compelling data and tools, factors that make data useful and searchable, strategies for sharing data, mapping terminologies and ontologies and mechanisms for strong industry involvement in the nanoinformatics effort. Held in Philadelphia, PA at the University of Pennsylvania.
